Showing a delicate feel for grooves n melodies, „**Memory Replay**“ is a cleverly addictive track. Its overall classic feel reminded us of the works of Boo Williams. The chord’s playfulness never drifts too far astray from the floor, as it sits on some solid funk-fueled bass. **Audio Units’** musical mastership makes up for a standout, yet universal ,tool of cool’!

Self-assured as an old classic! Citing one of Chi-town’s hymns, the sounds here equally show the Chicago and Detroit heritage the brothers look up to and have studied. Bubbly yet elegant, this one will shuffle some hips and start the night. Oh... and should there be no crowd yet: celebrate the music, that’s exactly what Audio Units do!

Color Ray deals with the expertise of the original’s matter in orderly fashion. Stripping the blue notes and chord excursions to keep it more loopy and straight. Firing up the beat a little, but keeping the epic vibe and enhancing the trance for your minds. Finally this version turns out to be a flight like trip itself!
